Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14, 29, and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 14, the claim further defines the “object” of claim 13, however, the “object” of claim 13 is not apart of the claimed invention, and thus fails to further limit the claimed invention. Correction is required.

With respect to claim 29, it is unclear as to how many extension members are required. It is suggested the applicant recite that the extension member “can be made” or “is adapted to be made” in/into a plurality of sizes. As currently written, the claim may be interpreted as comprising a plurality of extension members available in various lengths, when only one extension member is clearly intended.

With respect to claim 30, though not an ambiguity per se, the frame assembly’s relationship to the unclaimed all-terrain vehicle, is not a patentably distinct feature of the support bracket and will not receive any consideration when determining patentability thereof.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3634

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-20, 29, and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Fugman #5,651,484. Fugman, as best seen in Figures 6, 8, and 9, discloses a vehicle attachable support bracket assembly 10, comprised of a pair of ladder receiving tubular frame assemblies 24, each frame assembly having an elongated (ladder engaging) main leg member 42, a V-shaped extension member located at an end of 42, comprised of elements 74, 76, 78, upper arm members 82, 50, located at a second end of 42, and a retaining member assembly comprised of horizontally extending elements 30, 34, which extend from arm member 50.

Allowable Subject Matter

Claims 21-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for the allowable subject matter of claim 21 is the inclusion of the main leg member having a curved lower end forming a threaded cusp that threadably receives the extension member, and the main leg member also having an upper end with an eye affixed thereto. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Conclusion

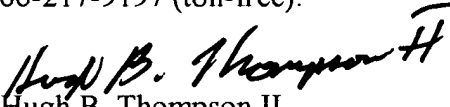

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mitchell et al #4,751,981, Sexton #5,398,778, Olms et al #5,850,891, and Haynes #6,105,721 are cited to teach ladder support racks.
